WHAT IS CYBER SECURITY

Cyber Security is the practice of protecting computers, networks, systems, and data from cyber attacks, unauthorized access, and digital threats.

CIA TRIAD

CIA Triad is the foundation of cybersecurity. It consists of Confidentiality, Integrity, and Availability, which help ensure information is secure, accurate, and accessible to authorized users.

Confidentiality: Only authorized users can access information.

Integrity: Information should remain accurate and unaltered.

Availability: Systems and data should be available whenever needed.

WHAT IS PHISHING?

PHISHING IS A CYBER ATTACK WHERE ATTACKERS PRETEND TO BE A TRUSTED PERSON OR ORGANIZATION TO STEAL SENSITIVE INFORMATION SUCH AS PASSWORDS, OTPS, BANK DETAILS, AND PERSONAL DATA.

TYPES OF PHISHING ATTACKS

1. Email Phishing

- Fake emails sent to steal sensitive information.
- Example: Fake bank or shopping website emails.

2. SMS Phishing (Smishing)

- Fake SMS messages with malicious links.
- Example: "Your KYC has expired. Click here."

3. Voice Phishing (Vishing)

- Fake phone calls pretending to be bank officials or customer support.
- Example: Asking for OTP or bank details.

4. Spear Phishing

- A targeted phishing attack aimed at a specific person or organization using personalized information.
- Example: An employee receives an email mentioning their name and company.

5. Whaling

- A phishing attack targeting high-profile individuals such as CEOs, Directors, or Managers.
- Example: A fake email sent to a CEO requesting an urgent money transfer.

SOCIAL ENGINEERING

Social Engineering is a technique used by attackers to manipulate human emotions and gain sensitive information instead of directly attacking computers.

COMMON EMOTIONS EXPLOITED BY ATTACKERS

- Urgency – "Your account will be blocked!"
- Fear – "Your account has been hacked!"
- Greed – "You won ₹1,00,000!"
- Curiosity – "See who viewed your profile."
- Trust – Pretending to be a bank, company, or friend.

HOW TO IDENTIFY A PHISHING EMAIL

FAKE EMAIL

From:
support@sbi-login.xyz
Subject: Urgent! Verify Your SBI Account

Dear Customer,

Your account will be blocked within 24 hours.

Click here:
www.sbi-login.xyz

Regards,
SBI Team

RED FLAGS

- *Check the sender's email address (Official email or fake?)*
- *Generic greeting (e.g., "Dear Customer")*
- *Urgent or threatening language ("Act Now!", "Account will be blocked!")*
- *Grammar and spelling mistakes*
- *Suspicious links or attachments*
- *Never share passwords, OTPs, or bank details through email*

HOW TO IDENTIFY A FAKE WEBSITE?

RED FLAGS

- Check the official domain name (e.g., sbi.co.in)
- Look for spelling mistakes in the URL (e.g., sbii.co.in)
- Beware of extra words like login, verify, secure, update
- HTTPS alone does not mean the website is genuine
- Do not trust only the lock icon
- Never enter passwords or OTPs on suspicious websites

Original Website

<https://sbi.co.in>
Official Domain
Trusted

Fake Website

<https://sbi-login.xyz>
Fake Domain
Suspicious

Safety Measures Against Phishing Attacks

Best Practices

- Verify the sender's email address before opening links or attachments.
- Always check the official website URL before entering sensitive information.
- Never share passwords, OTPs, PINs, or bank details with anyone.
- Enable Two-Factor Authentication (2FA) on your accounts.
- Avoid clicking suspicious links received through email, SMS, or social media.
- Keep your operating system, browser, and antivirus software up to date.
- If you receive a suspicious message, contact the organization through its official website or customer care number to verify it.

1. WHAT IS PHISHING?

01

A programming language

02

A cyber attack to steal sensitive information

03

A type of antivirus

2. WHAT DOES HTTPS INDICATE?

01

Secure communication between your browser and the website

02

The website is always genuine

03

The website cannot be hacked

06

3. WHICH WEBSITE IS MORE LIKELY TO BE THE OFFICIAL SBI WEBSITE?

01

<https://sbi-login.xyz>

02

<https://verify-sbi.net>

03

<https://sbi.co.in>

THANK YOU
